OUR NEW

AMADA

Press Brake

## Excellent benefits for Servosteel customers

Our new Amada Press Brake will take the stress out of that all important secondary folding operation to give you the competitive benefit of single sourcing all your component requirements.

The Amada HFE MII 2204 Press Brake has a capacity range of 4.2m and alongside this investment we have a range of tooling to cater for all our customers' needs.

Press braking is a useful production technique that is used in various industries, including architectural, construction, engineering, handling systems and transportation.

### Machine Features:

- » Four or seven controlled axes
- » Press forces up to 2,200kN
- » Bend length range from 0 to 4.2m
- » Radius from 1 to 41mm
- » Perfect precision starting with the very first part
